What Doesn't Kill Us, a New York Times bestseller, traces our
evolutionary journey back to a time when survival

depended on how well we adapted to the environment around us. Our ancestors crossed deserts, mountains, and oceans without even a whisper of what anyone today might consider modern technology. Those feats of endurance now seem impossible in an age where we take comfort for granted. But what if we could regain some of our lost evolutionary strength by simulating the environmental conditions of our ancestors? Investigative journalist and anthropologist Scott Carney takes up the challenge to find out: Can we hack our bodies and use the environment to stimulate our inner biology? Helping him in his search for the answers is Dutch fitness guru Wim Hof, whose ability to control his body temperature in extreme cold has sparked a whirlwind of scientific study. Carney also enlists input from

an Army scientist, a world-famous surfer, the founders of an obstacle course race movement, and ordinary people who have documented how they have cured autoimmune diseases, lost weight, and reversed diabetes. In the process, he chronicles his own transformational journey as he pushes his body and mind to the edge of endurance, a quest that culminates in a record-bending, 28-hour climb to the snowy peak of Mt. Kilimanjaro wearing nothing but a pair of running shorts and sneakers. An ambitious blend of investigative reporting and participatory journalism, *What Doesn't Kill Us* explores the true connection between the mind and the body and reveals the science that allows us to push past our perceived limitations.

A New York Times Bestseller Detroit, mid-1930s: In a city abuzz over its unrivaled sports success, gun-loving baseball fan Dayton Dean became ensnared in the nefarious and deadly Black Legion. The secretive, Klan-like group was executing a wicked plan of terror, murdering enemies, flogging associates, and contemplating armed rebellion. The Legion boasted tens of thousands of members across the Midwest, among them politicians and prominent

citizens—even, possibly, a beloved athlete. Terror in the City of Champions opens with the arrival of Mickey Cochrane, a fiery baseball star who roused the Great Depression ' s hardest-hit city by leading the Tigers to the 1934 pennant. A year later he guided the team to its first championship. Within seven months the Lions and Red Wings follow in football and hockey—all while Joe Louis chased boxing ' s heavyweight crown. Amidst such glory, the Legion ' s dreadful toll grew unchecked: staged “ suicides, ” bodies dumped along roadsides, high-profile assassination plots. Talkative Dayton Dean ' s involvement would deepen as heroic Mickey ' s Cochrane ' s reputation would rise. But the ballplayer had his own demons, including a close friendship with Harry Bennett, Henry Ford ' s brutal union

buster. Award-winning author Tom Stanton weaves a stunning tale of history, crime, and sports. Richly portraying 1930s America, *Terror in the City of Champions* features a pageant of colorful figures: iconic athletes, sanctimonious criminals, scheming industrial titans, a bigoted radio priest, a love-smitten celebrity couple, J. Edgar Hoover, and two future presidents, Gerald Ford and Ronald Reagan. It is a rollicking true story set at the confluence of hard luck, hope, victory, and violence. .

Hitler's obsession with the Habsburg Imperial family became the catalyst for his vendetta against a vanished empire, a dead archduke, and his royal orphans. That hatred drove Hitler's rise to power and led directly to the tragedy of the Second World War and the Holocaust. The royal orphans of Archduke Franz Ferdinand—offspring of an upstairs-downstairs marriage that scandalized the tradition-bound Habsburg Empire—came to personify to Adolf Hitler, and others, all that was wrong about modernity, the twentieth century, and the Habsburgs' multi-ethnic, multi-cultural Austro-Hungarian Empire. They were outsiders in the greatest family of royal insiders in Europe, which put them on a collision course with Adolf Hitler. As he rose to power Hitler's hatred toward the Habsburgs and their diverse

empire fixated on Franz Ferdinand's sons, who became outspoken critics and opponents of the Nazi party and its racist ideology. When Germany seized Austria in 1938, they were the first two Austrians arrested by the Gestapo, deported to Germany, and sent to Dachau. Within hours they went from palace to prison. The women in the family, including the Archduke's only daughter, Princess Sophie Hohenberg, declared their own war on Hitler. Their tenacity and personal courage in the face of betrayal, treachery, torture, and starvation sustained the family during the war and in the traumatic years that followed. Through a decade of research and interviews with the descendants of the Habsburgs, scholar James Longo explores the roots of Hitler's determination to destroy the family of the dead

Bruins and a first-round NBA draft pick, thought he 'd made peace with the NCAA 's exploitive system of "amateurism." College athletes generated huge profits, yet—training nearly full-time, forced to tailor coursework around sports, often pawns in corrupt investigations—they saw little from those riches other than revocable scholarships and miniscule chances of going pro. Still, that was all in O ' Bannon ' s past...until he saw the video game NCAA Basketball 09. As avatars of their college selves—their likenesses, achievements, and playing styles—O ' Bannon and his teammates were still making money for the NCAA. So, when asked to fight the system for players past, present, and future—and seeking no personal financial reward, but rather the chance to make college sports more fair—he
