This approach is intended to provide students with an appreciation for the real problems that are encountered in the understanding of how we produce and use energy, and the realization that, while exact calculations are important and necessary, a broadly

We set out hoping to boil down the sprawling SWE archives into one scrapbook that takes you on a journey through SWE's history. After all, there's something magical about reading through a scrapbook and having so many pieces of history, full of so many memories, laid out before you. That's

the feeling we got when we opened the archives, and it's the feeling we wanted you to have when you open this book. Joy and heartache, triumph, tribulations and perseverance, grace and the kind of tenacity you could only find in the heart of a woman engineer-you'll find it all here. The history of our Society is more than

a straightforward chronology of things that have happened. Our history is the result of the choices we've made, the small moments with friends we shared, our achievements and accomplishments. SWE's history is not something that merely happened; it's what we built for ourselves.

Humanity pushed its way to the stars - and encountered the Gbaba, a ruthless alien race that nearly wiped us out. they've built a religion

religion designed to  
keep Safehold society

automated recordings,  
"Nimue" - or, rather, the

this will be easy. To
