Letter From the Editor, 2012Dear Reader,Thank you for picking up this magazine. Inside you will find a world of wonders. If you are like most people you will flick through and look at the art first. We are proud to feature gallery prints from iconic photographer Kim Weston. The art editor and I met Kim a few years ago at the Henry Miller Library over dinner, and have been trying to get his beautiful photographs in our magazine ever since. It is thanks to the dogged tenacity of River Tabor that we are able to feature work by an astounding member of the Weston dynasty.Tim Youd did an entire art exhibit based on a passage out of Henry Miller's Tropic of Capricorn. We have a poem by Big Sur visitor and raconteur Richard Brautigan. This poem seems to embody the internal landscape of the author. We are fortunate to have so many talented people in the planisphere that is the Henry Miller Memorial library, and are happy to have so many West Coast writers and artists featured in this issue. The Library is an amazing cultural venue, a local's hang out, a bookstore, a concert venue, and a film theatre, but it is also a fragile watershed. Our commitment to keeping this delicate ecosystem in check is part of why this year we have launched into our capital fundraising campaign, in an effort to retrofit Emil White's little cabin into a place that hosts such acts as Thurston Moore of Sonic Youth.I met Thurston on a damp afternoon at the library. I am not an interviewer per say, but I do love listening to people's stories. Thurston Moore and I talked about poetry and art under a persimmon tree, the interview featured herein is the fruit...The East Coast is always well represented since half of our editors live in Brooklyn, which I like to call the poetry capital of the U.S. of A. We have the wondrous poets Leah Umansky, J. Hope Stein, Joanna Penn Cooper and Angela Wong featuredEnjoy!Maria Garcia Teutsch

The application of radiation to medical problems plays an ever-increasing role in diagnosis and treatment of disease. It is essential that medical physicists have the knowledge, understanding and practical skills to implement radiation protection as new techniques are developed. Practical Radiation Protection in Healthcare provides a practical guide for medical physicists and others involved with radiation protection in the healthcare environment. The guidance is based on principles set out in current recommendations of the International Commission for Radiological Protection and methods developed by a variety of professional bodies. Written by practitioners experienced in the field this practical reference manual covers both established techniques and new areas of application. This new edition has been fully revised and updated to cover new requirements linked to the increased knowledge of radiation effects, and the development of new technology. Each specialist area is covered in a separate chapter to allow easy reference with individual chapters being assigned to different types of non-ionising radiations. Tabulated data is included to allow the reader to carry out calculations for situations encountered frequently without reference to further texts.

Although her best friend tries to help her, Cath Herrick knows that after waking up from a coma caused by a car accident, she must rebuild her own life

Fay Merryweather loves her home on Honeysuckle Lane, but running her tea rooms, looking after her mother and trying to be a good girlfriend and sister doesn't leave her with much spare time. When she does get a moment, she finds herself at the bottom of her garden, full of lovely blossoms and gorgeous blooms, sitting alongside the peaceful canal that runs through her hometown. It is her favourite place. Then Danny Wilde walks into her life. He makes Fay feel things she's never felt before and try as she might to resist, she is inexplicably drawn to him. But when a sudden tragedy strikes, her entire world is thrown off balance and she doesn't know which way to turn.

The Scottish Nation examines the social, political, religious and economic factors that have shaped modern Scotland. Drawing on the latest research, Devine places Scotland firmly within an international context and provides a key focus for the ongoing debate regarding Scotland's future. This new edition brings the reader up-to-date with Scotland's recent history, from the high politics of the devolved parliament to the everyday effects of huge and growing levels of social inequality.

For Dillon Latimer, meeting his long-lost mother comes too late. He's been a ghost for five years. Still, a little thing like death won't get in Dillon's way when he decides his mom's life needs improving. Unfortunately, it's not easy for ghosts to influence the material world, especially when every choice Sylvie makes brings her deeper and deeper into danger. Sylvie Blair ran away for reasons that seemed right at the time but she's never let go of the past. When it comes back to haunt her - literally - she's forced to face her regrets, even as she tries to decide whether to believe her high school sweetheart's crazy stories about ghosts and drug cartels. Can Sylvie let go of the past and embrace the future? And can Dillon keep his mom alive long enough for her to live happily ever after with his dad?

Textbook for engineering drawing students which covers areas such as standards and information, geometrical constructions, orthogonal projection, intersections and development of surfaces. Each chapter contains step-by-step instructions with problems set out in examination format. This fourth edition has been revised to conform to current Australian standards. Includes reference tables commonly used by drafters and an index. An accompanying solutions manual is available.
