"Fallon Parker's dream has always been to turn her family's wine company into a runaway success and eventually start a cellar of her own. Since graduating from college, she has worked relentlessly to make that dream a reality, especially after taking a chance on love!and losing. By the time Fallon becomes an official sponsor of the Nashville Assassins, she feels like all her hard work is finally paying off. And then the man who broke her heart skates back into her life. On the ice, Lucas Brooks is the NHL's leading scorer!at least when he's not in the box. Off the ice, he's a mess, with all his anger and misery bottled up inside. He threw away the most important person in his life and has regretted it ever since. But when Lucas returns to Nashville in a trade, he's determined to convince Fallon that he's a changed man. The attraction is still there. The tension is electrifying. But the odds are stacked against them!especially after Lucas finds out that Fallon has been keeping a devastating secret."~Publisher's description.

Chris, a sexy tattoo artist, tries to win the heart of Sarah, a grad student with little interest in him, in this second e-short and follow-up to Helena Hunting's gripping love story, Clipped Wings!twisted, dark, incredibly erotic!a love story like no other! (USA TODAY bestselling author Alice Clayton). Part owner of the Chicago tattoo shop Inked Armor, Chris Zelter is a talented artist who decorates skin with gorgeous designs. He might look the part of the typical jacked-up, inked-up bad-boy, but underneath is a fiercely loyal, complicated man. Kicked out at sixteen, Chris has had to fend for himself for the last twelve years, making his Inked Armor crew as much family as they are business partners. For him, it's enough!until he meets Sarah Adamson. A grad student waitressing at the local strip club, Sarah is used to propositions and crude comments. The job is a means to an end!finish her MBA, pay off the tuition loans, and get a good job. Then she won't have to rely on anyone to take care of her. So when brawny, tatted up Chris begins hanging out at the club, she rebuffs his advances. At first. But Chris isn't like her usual clientele: despite his hard exterior, he's almost!sweet. Sometimes, the people with the roughest edges have the biggest hearts.

This book focuses on a range of geospatial applications for environmental health research, including environmental justice issues, environmental health disparities, air and water contamination, and infectious diseases. Environmental health research is at an exciting point in its use of geotechnologies, and many researchers are working on innovative approaches. This book is a timely scholarly contribution in updating the key concepts and applications of using GIS and other geospatial methods for environmental health research. Each chapter contains original research which utilizes a geotechnical tool (Geographic Information Systems (GIS), remote sensing, GPS, etc.) to address an environmental health problem. The book is divided into three sections organized around the following themes: issues in GIS and environmental health research; using GIS to assess environmental health impacts; and geospatial methods for environmental health. Representing diverse case studies and geospatial methods, the book is likely to be of interest to researchers, practitioners and students across the geographic and environmental health sciences. The authors are leading researchers and practitioners in the field of GIS and environmental health.

Mounting evidence in the last years has demonstrated that self-regulation of brain activity can successfully be achieved by neurofeedback (NF). These methodologies have constituted themselves as new tools for cognitive neuroscience establishing causal links between voluntary brain activations and cognition and behavior, and as potential novel approaches for clinical applications in severe neuropsychiatric disorders (e.g. schizophrenia, depression, Parkinson's disease, etc.). Current developments of brain imaging-based neurofeedback include the study of the behavioral modifications and neural reorganization produced by learned regulation of the activity of circumscribed brain regions and neuronal network activations. In a rapidly developing field, many open questions and controversies have arisen, i.e. choosing the proper experimental design, the adequate use of control conditions and subjects, the mechanism of learning involved in brain self-regulation, and the still unexplored potential long-lasting effect on brain reorganization and clinical alleviation, among others. This special issue on self-regulation of the brain of emotion and attention using NF approaches interested authors to report technical and methodological advances, scientific investigations in understanding the relation between brain activity and behaviour using NF, and finally studies developing clinical treatment of emotional and attentional disorders. The editors of this special issue anticipate rapid developments in this emerging field.

Due to the rise in petroleum prices as well as increasing environmental concerns, there is a need to develop biochemicals and bioproducts that offer realistic alternatives to their traditional counterparts; this book will address the lack of a centralized resource of information on lubricants and greases from renewable sources, and will be useful to a wide audience in industry and academia. It is based on 20 years of research and development at the UNI-NABL Center, and discusses the various types of vegetable oils available, comparing their characteristics, properties and benefits against those of typical petroleum oils as well as discussing common evaluation tests and giving examples and case studies of successful applications of biobased lubricants and greases. Whilst scientific and engineering research data is included, the book is written in an accessible manner and is illustrated throughout. Focuses on an industrial application of lubrication technology undergoing current explosive growth in the global market. Includes a detailed review of the material benefits of plant-based lubricants that include a better viscosity index and lubricity even at extreme temperatures, lower flammability due to higher flash points and lower pour points. Covers the basic chemistry of vegetable oils as well as their profiles for use in lubricants and greases and environmental benefits. Includes examples and case studies of where vegetable-based lubricants have been successfully employed in industry applications.

Presents a collection of essays on various topics in science and personalities in science, including Carl Sagan, Sigmund Freud, and Alfred Russel Wallace.

The very short prequel to Tessa's Pride by Olivia Brynn Cowgirl! Tessa McCade has a rare day off from Bradley Equine Ranch, and she's got a plan. She mounts her favorite horse to ride to a secluded spot on the Montana horse ranch with a book, a snack, and a towel for skinny-dipping. When her boss!Joshua Bradley himself!joins her, Tessa knows it will take all her strength to keep her feelings for the man at bay. If there's one thing Tessa didn't plan on today, it's Josh's surprising admission. *Bonus! Includes the first two chapters of Tessa's Pride!"

Cameron knows, objectively, that he is skinny. The mirror tells a different story. Tommy knows, objectively, that the world is survivable. His head tells a different story. So when they find themselves in Brooklyn High School's Most Screwed Up Kids group (not official title), with little in common but a shared tendency to self destruction, it can't do any harm to strike up a conversation, right? And if it'll get John off Cameron's back, maybe having a friend would be good for him.
