Contract, Governance and Transaction Cost Economics

Transaction cost economics suggests that the costs and difficulties associated with market transactions sometimes favor hierarchies (or in-house production) and sometimes markets as an economic governance structure. An intermediate mechanism, called hybrid or relational, between these two extremes has recently emerged as a new governance structure .

Transaction cost economics - IS Theory

Transaction Cost Economics (TCE) is one of the most established theories to address this fundamental question. Ronald H. Coase, in 1937, was the first to highlight the importance of understanding the costs of transacting, but TCE as a formal theory started in earnest in the late 1960s and early 1970s as an attempt to understand and to make empirical predictions about vertical integration (“the make-or-buy decision”).

Transaction Cost Economics as a Theory of the Firm ...

Transaction cost economics is understood as alternative modes of organizing transactions (governance structures – such as markets, hybrids, firms, and bureaus) that minimize transaction costs (Williamson 1979).

In economics and related disciplines, a transaction cost is a cost in making any economic trade when participating in a market. Oliver E. Williamson's Transaction Cost Economics popularized the concept of transaction costs. Douglass C. North argues that institutions, understood as the set of rules in a society, are key in the determination of transaction costs. In this sense, institutions that facilitate low transaction costs, boost economic growth. Douglass North states that there are four factors
