V is for Venus Flytrap: A Plant Alphabet (Science Alphabet ...

The Venus flytrap (*Dionaea muscipula*) is a carnivorous plant native to subtropical wetlands on the East Coast of the United States in North Carolina and South Carolina. It catches its prey—chiefly insects and arachnids—with a trapping structure formed by the terminal portion of each of the plant's leaves, which is triggered by tiny hairs (called "trigger hairs" or "sensitive hairs") on ...

V Is for Venus Flytrap: A Plant Alphabet: Gagliano, Eugene ...

Venus flytrap, perennial carnivorous plant of the sundew family, notable for its unusual habit of catching and digesting insects and other small animals. Venus flytraps do not rely on carnivory for energy but rather use the nitrogen-rich animal proteins to enable their survival in marginal soil conditions.
